Our Contrabassoon

Aren't it often the small things that make life easier? That's why we have repeatedly made small changes to the mechanics to make playing this instrument more comfortable. This allows you to fully focus on what matters most - the music. You can find our contrabassoon in all the major orchestras of the world. For example, it is played by Mr. Gregg Henegar in the Boston Symphony Orchestra. A contrabassoon by Gustav Mollenhauer & Sons is also played in the Mariinsky Theatre, London Symphony Orchestra, Hamburg State Opera, and many other renowned orchestras. Representation for America.
